

Press Release – Immediate Release

January 2011

A 4WD shock absorber with a Lifetime Warranty – that’s what you can now get from Roadsafe PAJA’s Brisbane warehouse.

Roadsafe Automotive, distributor of Australia’s largest range of Steering and Suspension, is pleased to announce the addition of the OzTec 4WD Shock Absorber range to its list of quality lines.

OzTec is the brand name of a first class range of 4WD suspension components, headed up by 4WD shock absorbers, researched, developed and tested by GSA Wholesale Suspension in Australia to suit Australian conditions. To bring such a high quality product to the market one of the world’s most highly regarded manufacturers, “Cofap” were chosen to fabricate the OzTec shock range.

OzTec’s shock range has been designed by George Shephard, who has over 40 years experience in the automotive and suspension industry. With motorsport results to his credit such as three Australian Rally Championships, eight state rally championships, two Round Australia rallies and two Bathurst 1000 races working with such greats as Peter Brock, Jim Richards, Dick Johnson and Ed Ordynski, just to name a few, George’s experience goes without question.

The quality OzTec shock range is a perfect addition to Roadsafe’s expanding 4WD program.

The OzTec range of 4WD shocks consist of 112 part numbers covering a huge variety of applications. The program has two awesome features to set it apart from other 4WD shock programs:

Firstly, George Shephard is so confident in the product design and quality, the Oztec 4WD shocks are covered by a **Lifetime Warranty**.

Secondly, the product range has been taken a step further, than just a shock range, by developing the OzTec “Comfort” range to suit lightly loaded vehicles with minimal accessories & comfort (if the priority), in addition to the “Cargo” range that are designed to control the extra weight when steel bull bars, roof racks, long range tanks, winches and the like are fitted. The different categories allows for selection of the best outcome for a customer’s particular needs. Better yet... the catalogue has been designed and set out in a “menu for vehicle” style to assist in choosing the most appropriate shocks for a given application relevant to the type of accessories fitted.

OzTec shocks will be available from Roadsafe’s QLD warehouse effective February 1st 2011.

For additional information on the OzTec 4WD shock range including distribution opportunities, please give Greg Bostock a call on 0423 372 223 or call Roadsafe on 1300 559 086.
